June 27, 2022

Updates

- Changed the default IPv6 prefix to `fc00::/7`, which is the standardized prefix for local networks, see RFC 4193. So the subnets are now called `fc00:0:0:0:0:0:0:0::/64` and `fc00:0:0:0:0:0:0:1::/64`.
- More HW: On the 17th, we bought battery connectors for an empirical test on battery consumption. In the sadly last Conrad store in Kreuzberg.
- Designed a simple Route scheme for the CoAP communication.
- Not related directly, but we filed a bug report:
<https://github.com/RIOT-OS/RIOT/issues/18228>
